

## Land Remediation

Our experience covers all aspects of the land remediation process, from initial site investigation through to the controlled transfer of contaminated waste at our own facilities. Using Omega Environmental Services as your service provider will assure you of continuity between each stage of the remediation process, avoiding costly delays as new contractors come on board.

All remediation projects differ in size, scope and content. Because no single set of solutions will fit every scheme, we will work with you to tailor our services to the needs of your project and the demands of the site(s).

Omega provides the following:

- Initial assessment of impacted land to aid developers at bid stage and with regulatory engagement
- Site investigation and identification of suitable land remediation measures
- Careful monitoring to ensure Hazardous Substances exposure level is not exceeded
- Ensuring compliance with legislative and environmental requirements
- Chemical analysis of soil
- Safe removal and disposal of asbestos and other contaminants
- Pump & treat methodologies radiological decontamination
- Safe removal and disposal of invasive weed groundworks including excavation of site
