Welwyn Land Remediation

Value: £53,000.00

Duration: 4 weeks

Contract location: Welwyn Garden City

Type(s) of work: Land Remediation

Shredded Wheat SINCE 1893

Description of work

Omega Environmental Services were appointed to safely handpick the identified Amosite and Chrysotile containing asbestos materials to an area of approximately 12,100m^2.

Scope of works includes

- OES carried out all works under controlled conditions within the confines of a respirator zone to ensure the safe removal and disposal of Amosite and Chrysotile products located within the over turned soil.
- All works were carried out under HSE notification and are to be conducted with full face RPE and all relevant personal protection.
- Works were controlled within a grid format to carry out the removal in a systematic, efficient and understanding manner.
- The Independent analyst was present on site to witness the live removal works and personal air monitoring was carried our throughout the project. Photographic evidence was taken by the asbestos supervisor to ensure the state of cleanliness to the client. The state of cleanliness was further enforced followed by the issuing of air monitoring certificates.
