
Broadway Cinema

Administrated from: Shillington (Southern Office)

Contract location: Hertfordshire

Value: £103,500

Duration: 1 month

Sector(s): Leisure

Type(s) of work: Asbestos Removal

Description of work

Omega Environmental Services Ltd were appointed to remove and dispose of asbestos from within the Broadway Cinema located in Letchworth. To do so an asbestos survey was carried out by ourselves to identify the type of asbestos present and the locations it exists in. Our survey discovered Chrysotile Asbestos in the roof space above the cinema.

Method of work

The method of work included the safe removal and disposal of cement debris to the roof. Omega were challenged to design a method of working that is appropriate in order to remove or encapsulate the waste to prevent risk to occupiers of the structure, other workers on site, Omega employees or anyone else who may come into contact with the risk. Due to major refurbishment works, the roof space needed to be environmentally cleaned to ensure safe access to other contractors. The designated Project Manager for this project designed and provided specific encapsulation environments in order to provide negative pressure enclosure containment to prevent asbestos contamination during the course of the works. Thanks to the hard work and expertise that Omega employees offer, this project ran smoothly and was successfully completed one week ahead of schedule.
