
Dolphin House

Administrated from: Shillington (Southern Office)

Contract location: London

Value: £100,000

Duration: 6 weeks

Sector(s): Real Estate

Type(s) of work: Asbestos Removal

Description of work

Omega undertook a project located in London in Sunbury on Thames. The task was to carry out the safe removal and disposal of asbestos in various forms from various locations. The scope of work carried out includes; the safe removal and disposal of AIB cavity closers containing Amosite.

Method of work

All works were proceeding in a systematic manner to eliminate potential risks. The asbestos was situated around the perimeter of the building and as a result, the floors had been laid out in a grid like pattern delineated by columns. The removal of asbestos was complimented by a hand held sprayer to lessen potential exposure. Areas for work were identified and briefed to operatives on a daily basis and will seek to continuously remove materials to enable the easy movement of waste materials, reduce the number of skips and traffic movements around the site. Throughout the duration of the project there were little to no incidences, which assisted the smooth running of the project and the successful completion.
