

Cottam Power Station

Value: £6,300,000.00

Duration: 24 months (on-going)

Contract Location: Nottinghamshire

Sector(s): Nuclear/Industrial

Type(s) of work: Licensed asbestos removal

Description of work

To carry out the safe removal and disposal of all Licensable Asbestos Containing Materials as identified within the survey provided at tender stage for an estimated programme of 83 weeks.

OES employ the following subcontractors on site:

Licensed Scaffolding: To enable the safe access to licensable ACMs.

Air Monitoring: Background and personal monitoring is carried out to ensure the fibre release count remains in the safety threshold.

Secondary Sampling: To ensure the accuracy against current survey.

Plant and Equipment: To provide OES with required plant and equipment required for the ACM removal works (inclusive of maintenance and testing).

OES are carrying out the ACM removal works in the following areas:

- Boilers 1 – 4
- De-Aerator Bays
- Gas Turbines
- Control Block
- Turbine Hall
- Downcomers
